# VISION & MISSION

It is often forgotten that there is only one reality and that without origin and scope, there is no final destination. If we take a close look at the specific aspects that characterize the legal profession, we can establish that there is a vertical and an horizontal. The vertical is integrant and integrative and represents the effectiveness of the legal advice and service, whereas the horizontal represents the knowledge and experience accumulated through practice in various domains and throughout a long period of time. We cannot have one without the other. Therefore, we believe that strong vision, mission and values are the core elements of a well-structured “management” of the legal issues and laws.

## VISION

A.C. POP Law Office will be go-to trusted advisors for Romania and Eastern Europe, offering high quality services both in terms of consultancy and litigation.

## MISSION

A.C. POP Law Office provides comprehensive legal and consulting services, using a practical and client-focused approach to identify and respond to all of our client's challenges and requests.
